### EDUCATION

- Bachelor's in Software Analysis and Development. Expected graduation in December 2025. URI. Erechim
- Technical Course in Information Technology. Completed in 2021. IFRS. Erechim

### ABOUT ME

I am a full-stack developer with experience in Delphi and Java, working on the development and maintenance of desktop applications and web systems. Throughout my career, I have been striving to improve my skills through courses. In my most recent experience, I contributed to the creation of tools that optimized internal processes, such as automating manual tests, significantly reducing the time required for execution. I also led the development of management systems and database migration to ensure compatibility and integrity. During this period, I handled over 100 support tickets, always seeking quick and effective solutions for clients. Currently, I am pursuing a degree in Software Analysis and Development to stay up to date and further expand my technical knowledge.

**Keywords:** System development, Java developer, Spring developer, React developer, Delphi developer, Software development, System integration, Software quality processes, Agile development.

### WORK EXPERIENCES

AGRO 1, Erechim – 11/2023 to 07/2024

**Position:** Delphi Developer

**Responsibilities:** I developed and maintained desktop applications for the agribusiness sector, working with multidisciplinary modules such as financial management, inventory, invoicing, and more. I created an internal tool to automate the QA team's manual testing, reducing test preparation time from 40 minutes to 10 minutes. I configured and implemented error reporting in Jenkins during the development stage, improving issue detection efficiency. Additionally, I handled over 100 support tickets, ensuring quick and effective solutions for clients.

SYSTEM, Erechim – 05/2022 to 10/2023

**Position:** Java and Delphi Developer

**Responsibilities:** I developed and maintained Delphi desktop applications and Java-based web systems, focusing on public sector and HR solutions. I led the development of a financial system that simulated all retirement modalities for approximately 2,000 employees of the Erechim City Hall. Additionally, I migrated databases for five clients, ensuring version compatibility and data integrity.

## CERTIFICATIONS & ADDITIONAL COURSES

- Cloud & AWS – Udemy: *RESTful APIs from Scratch to AWS with Spring Boot 3, Java, and Docker*
- API & Microservices – URI: *Development of APIs and Microservices with Spring Boot*
- Java & Spring Boot – URI: *Advanced Java with Spring Boot*
- Continuous Integration – Udemy: *Testing and Automation with Jenkins*
- English Proficiency (C2) – *EFSET Certificate*
